Yale University’s interdisciplinary REU Site enables undergraduates with an interest in STEM to conduct 10 weeks of research at the interface of biology, physics and engineering at Yale. The program also includes professional development activities and workshops and is best suited for those interested in pursuing a STEM PhD or MD/PhD.

- No previous research experience needed.
- Rising sophomores are encouraged to apply.

- 10 weeks, June 1 - Aug 6, 2021
- $5,500 stipend
- Up to $500 towards travel
- $1,300 food stipend
- Free housing provided on Yale’s campus

Application deadline: February 1

Click here to visit the REU Site website

Click here to APPLY (through the Leadership Alliance Summer Research - Early Identification Program)

We will run the program in person (hopefully) or virtually (as we did in 2020).
